

# Hello! I'm Zakharenko Valerij

I am passionate about programming at all and especially about web programming. I am a skilled back-end developer with some experience in front-end. I am meticulous about cleanliness of the code. I am a quick learner and a team worker that gets the job done. Dreaming about project in field of music to combine both of my most biggest interests.

Main stack: **ASP.NET Core web app with docker support**

Address: **Minsk, Belarus**

English: **B1**

Age: **25**

Working: **4 years 8 months**

Status: **Looking for a new job**

## My services

As a programmer, I offer high quality website development services in any field, as a solo programmer or in a team.

Back-end  
development

Front-end  
development

Any other  
development

Code review

## My technologies

C#

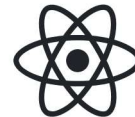

ASP.NET Core

JavaScript

EF Core

React.js

Also I have some experience with

SQL

Docker

PowerShell

Vue.js

Node.js

bash

PostgreSQL

RabbitMQ

MongoDB

# My experience

## Fullstack developer

Centaurea (1 year 11 months)

I took part in developing of three web applications: company website, website for real estate, and web dashboard for IoT system with English-speaking customer, with whom I communicated through emails and chats. One of them created as ASP.NET Core web API with SPA front-end on the React.js, two others - monolith ASP.NET Core apps with Razor pages and Vue.js front-end, a third one created as ASP.NET Core web API with SPA front-end on the React.js.

## Back-end developer

VEB Technologies (2 years 7 months)

Main project which I were working on is a B2B webapp for bank. I was developing microservice web api on a ASP.NET Core and Docker support with agile-like organized work process. For this project I were main code reviewer. Also there was small project on Express.js for which I developed API by oneself and delivered it before deadline.
